

## MapReduce v1 and v2 (2)

- **CDH4 includes MRv2 as a technology preview**
- **CDH5 MRv2 is production-ready**
  - Cloudera recommends using MRv2 in CDH5
- **CDH5 supports both MRv1 and MRv2**
  - Running both on the same cluster is *not* supported
- **Migrating from MRv1 to MRv2**
  - CDH offers full binary compatibility, source compatibility in almost all cases
