Key Points

- **HDFS daemons**
  - NameNode (master node)
  - DataNode (slave nodes)
  - (Secondary NameNode if not running High Availability HDFS)

- **Key MapReduce daemons**
  - MRv1: JobTracker (master node)
  - MRv1: TaskTracker (slave nodes)
  - MRv2: ResourceManager (master node)
  - MRv2: NodeManager (slave nodes)
  - MRv2: ApplicationMaster (slave node, one per job)

- **Hadoop Ecosystem**
  - Many projects built on, and supporting, Hadoop
  - Several will be covered later in the course
